

Thomas  
Westerlinck

## ABOUT

Ever since I can remember I have been surrounded by computers. This is probably why my passion and interest in working with computers after my highschool career ended, was an obvious choice but finding the right education was harder.

I wanted to combine my creativity with my passion for computers and after some challenges I found myself at Thomas More college where I studied Interactive Multimedia Design. It was during this time that I found out that UX/UI design and Usability are my cup of tea!
